

Python Programming

Day -1

24.01.24

- **Introduction to Programming**
- **introduction to Python**
- **Why Python?**
- **understanding Google colab Environment**
- **Python Variables**
- **Understanding Datatypes**
- **Getting Input**
- **printing values**
- **Operators**

Introduction to Programming

Computers are 100% obedient

It does what we instruct it do...

How do we Instruct it?

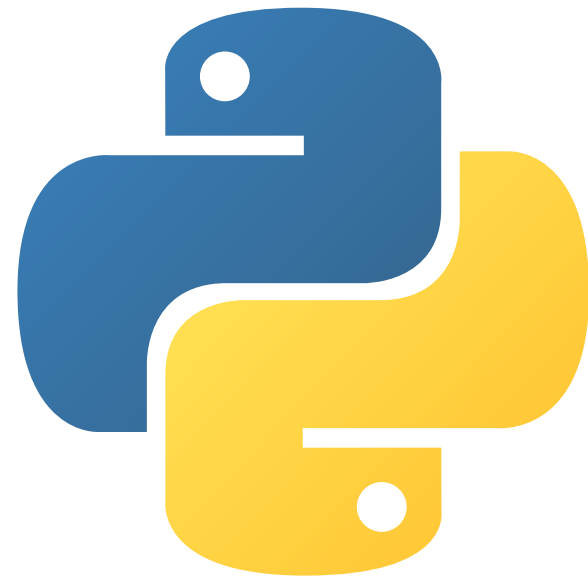

Through Programs..

What we can do with Programs?

We can **solve problems**

TASK

List Few Real World Problems

Python is a very Simple Programming Language

The lines used in Python is similar to the English Language

It contains 1,37,000 libraries and still continuing..

Python is free and open source
